

## **Draft Engineer Position with Heinz Wattie's**

### **About this job**

#### **Job description**

**Based at our Hastings Manufacturing site you will be required to apply your expertise to provide engineering support to production departments where required. Your main duties will consist of ensuring capital projects are carried out in an efficient and effective manner. You will define the project scope and budget and execute this on time and within budget. You will also need to provide drafting support to project engineers, and maintain factory layout drawings and utility drawings.**

**Our business lives and breathes continuous improvement and this is your chance to make your mark and contribute significantly to our business objectives. This role offers exciting challenges in a global business with a broad array of iconic brands, highly identifiable and trusted within the New Zealand marketplace.**

#### **Desired Skills and Experience**

**To be successful in this role you ideally will be degree qualified with a Bachelor of Engineering or Science. You will have 2D and 3D CAD experience in an engineering field and have worked in a mechanical engineering role. A strong attention to detail and good communication skills with a solid understanding of the continual need for process improvement is extremely desirable.**

### **About this company**
